

SEPTEMBER 2017

HP ENVY 6200, 7100, 7800 is the world's first in-class printer made with closed-loop recycled plastic - more than 10% by weight ¹

In July 2017, Keypoint Intelligence - Buyers Lab (BLI) was contracted by HP to conduct a study to determine if the ENVY 6200, 7100 and 7800 could be considered the world's first in-class inkjet all-in-one printer made with closed-loop recycled plastic (i.e. plastic taken and recycled from used printers). Plastic content from printers and electronics are typically "down-cycled" into a lower-grade plastic to be used in products like outdoor furniture or decking material. With a closed-loop system, the plastics from electronics are instead recycled into high-quality plastic used to offset the amount of virgin content in manufacturing new electronics.

¹ Compared to the majority of in-class consumer color desktop inkjet all-in-ones ≤\$199 USD. HP internal research survey of printer manufacturers' published specifications, sustainability reports and press releases as of 8/1/2017 and Keypoint Intelligence - Buyers Lab 2017 study commissioned by HP: <http://www.keypointintelligence.com/products/samples/hp-envy>. Market share as reported by IDC CYQ1 2017 Hardcopy Peripherals Tracker. The HP ENVY 6200, 7100 and 7800 all-in-one models contain more than 10% closed-loop plastic from recycled printers and other electronics plastic by weight of the plastic.

BLI's research and analysis team investigated comparable color desktop inkjet all-in-ones with a price less than or equal to \$199 USD to determine if those models were assembled using recycled plastics from used printers. BLI analysts have determined that, based on the research conducted, no other inkjet all in one device, priced at or below \$199 US (or international equivalents) retail as of this date, available on the market contains closed-loop recycled plastics. According to HP, its ENVY 6200, ENVY 7100 and ENVY 7800 printers, scheduled to be launched worldwide in September 2017, contain more than 10 percent closed-loop recycled plastic sourced from recycled printers and other electronics plastics.

Methodology

Keypoint Intelligence is a one-stop shop for the digital imaging industry, providing unparalleled tools and unmatched depth of knowledge, to cut through the noise of data and offer clients the unbiased insights and responsive tools. BLI's team reviewed a combination of product data sheets, sustainability reports, and corporate information found on manufacturer websites to determine if in-class inkjets contained recycled plastic content, as well as the percentage and source of the post-consumer plastic content.

Models employing thermal inkjet and piezo inkjet technology were included in the sample, while other printing technologies (including direct thermal, dye sublimation, thermal wax, laser/LED, and other non-inkjet technologies) were excluded. Note that BLI's team of analysts found a number of business-class devices that include post-consumer plastics from recycled printers, but those were not included in this competitive group due to price and/or technology. While every effort was made to include the most accurate and complete information, some markets/regions lack complete coverage due to the limited amount of publicly available data.

Models Included in the Sample

Vendor	Model Name	Contains Closed-Loop Recycled Plastic	Notes

¹ Compared to the majority of in-class consumer color desktop inkjet all-in-ones ≤\$199 USD. HP internal research survey of printer manufacturers' published specifications, sustainability reports and press releases as of 8/1/2017 and Keypoint Intelligence - Buyers Lab 2017 study commissioned by HP: <http://www.keypointintelligence.com/products/samples/hp-envy>. Market share as reported by IDC CYQ1 2017 Hardcopy Peripherals Tracker. The HP ENVY 6200, 7100 and 7800 all-in-one models contain more than 10% closed-loop plastic from recycled printers and other electronics plastic by weight of the plastic.

About Keypoint Intelligence - Buyers Lab

Since 1961, Keypoint Intelligence - Buyers Lab (BLI) has been the leading global independent office equipment test lab and business consumer advocate. In addition to publishing the industry's most comprehensive and accurate test reports on office document imaging devices, each representing months of exhaustive hands on testing in BLI's US and UK laboratories, the company has been the leading source for extensive runnability testing on imaging media and consumables, as well as extensive specifications/pricing databases on MFPs, printers, scanners and fax machines. BLI also has a long standing reputation for being the industry's most trustworthy and complete source for quality testing services and global competitive intelligence.

In addition to testing over 200 office document imaging devices and related consumables annually for its subscribers, BLI provides consulting services to buyers and a range of private testing services that include document imaging device beta and pre launch testing, performance certification testing, consumables testing (including toner, ink, fusers and photoconductors), solutions evaluations, and imaging media runnability testing.

For more information on BLI, call (973) 797-2100, visit www.keypointintelligence.com, or email info@keypointintelligence.com.
